Bioma®

Microbial-enzymatic inoculum

Kipos® kit composition to treat up to 100 m²

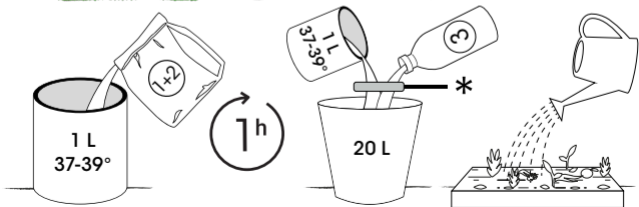

- **Kipos® 1+2** - Microbial-enzymatic inoculum - 170 gr
- **Kipos® 3** - Liquid activator - 100 ml
- **Kipos® Booster Fertilizer 4** - 100 ml
- **1 Fylo® Leaf Treatment 5** - 30 ml

10-15 days after

later on

* Strainer comes with the kit

Kipos® Humificant (1+2 & 3)

- 1.** In spring or when preparing the vegetable garden, pour components Kipos® 1+2 into 1 L of clean water at 37-39° C, mix well and let stand for 1 hour.
- 2.** Pour this preparation into 20 L of fresh water by passing it through the strainer. Then add the liquid component Kipos® 3 and mix well.
- 3.** Spray the entire lawn/garden.

Kipos® Booster Fertilizer 4

- 1.** Dilute Kipos® 4 in a bucket or in a watering can with about 20 L of clean water.
- 2.** Apply after 10-15 days from the first treatment with Kipos® Humificant 3.

Fylo® Leaf Treatment 5

- 1.** Dilute the content in a bucket or watering can containing about 20 L of clean water.
- 2.** When the plant reaches about 30% of its total development, spray the entire leaf area.
