Bioma[®]

Microbial-enzymatic inoculum

Vegetable waste treatment

Synthetos® kit composition to treat up to 3m³

- **Synthetos® 1+2** - Microbial-enzymatic mixture - 170 gr
- **Synthetos® 3** - Liquid activator - 100 ml

* Strainer comes with the kit

Synthetos[®]

- 1.** Dissolve components (powder) Synthetos[®] 1+2 in 1 L of clear water at 37-39° C, mix well and leave to stand for 1 hour (incubation time). This step is necessary to reactivate the microorganisms.
- 2.** At the end of the incubation, mix well and dilute the solution in 10 L of fresh water using the strainer that comes with the kit. Add liquid component Synthetos[®] 3.
- 3.** Bedew the pile of organic waste using a watering can with sprinkler head, or a pressure pump.
